

## Setting up configuration

Phoenix has a global configuration system. You can change the theme settings with a single global javascript object.

### Setting configuration

#### For Gulp based workflow

Edit the `src/js/config.js` file.

#### If you are not using Gulp based workflow

Edit the `public/assets/js/config.js` file.

#### Configuration object:

```
const initialConfig = {  
  phoenixIsNavbarVerticalCollapsed: false,  
  phoenixTheme: 'light',  
  phoenixNavbarTopStyle: 'default',  
  phoenixNavbarVerticalStyle: 'default',  
  phoenixNavbarPosition: 'vertical',  
  phoenixNavbarTopShape: 'default',  
  phoenixIsRTL: false,  
  phoenixSupportChat: true  
};
```

### Available Options

Option	Type	Defaults	Description
phoenixIsNavbarVerticalCollapsed	Boolean	false	Set <code>true</code> to make the vertical navbar stay collapsed when the page loads.
phoenixTheme	string	light	This option is for setting up the default color mode ( <code>light</code> , <code>dark</code> or <code>auto</code> ) for your project. Set <code>dark</code> to make the default color mode dark.
phoenixNavbarTopStyle	string	default	Set <code>darker</code> to make the top navbar darker when the page loads.
phoenixNavbarVerticalStyle	string	default	Set <code>darker</code> to make the vertical navbar darker when the page loads.
phoenixNavbarPosition	string	vertical	This option is for changing the navigation type. Available values: <ul style="list-style-type: none"><li>• <code>vertical</code></li><li>• <code>horizontal</code></li><li>• <code>combo</code></li></ul>
phoenixNavbarTopShape	string	default	Set <code>slim</code> to make the top navbar slim when the page loads.
phoenixIsRTL	Boolean	false	Use <code>true</code> to make the whole layout RTL (Right to Left). Recommended for languages such as Arabic, Hebrew, or other RTL languages.
phoenixSupportChat	Boolean	true	This option is for showing the chat widget. Set <code>false</code> to hide the chat widget when the page loads.
